

LANDSCAPE & PUBLIC REALM

ADDITIONAL TREES- OPTION 2

This diagram illustrates locations for the 9 additional trees missing from the original planning approved quantity. It fills the gaps in the line of Silver Birch on Pembury Road, augments the communal garden with a pair of *Acer griseum*, enriches the planted entrance area with three additional trees, and extends the line of London Planes along Dalston Lane.

These locations have been reviewed against the As Built utility drawings.

LEGEND

- **2 *Betula jacquemontii***
Himalayan Birch
Size: 18-20cm girth, 2m clear stem, semi-mature, typically 3.5m tall x 2m wide at planting
- **3 *Prunus avium***
Cherry
Size: multi stem, semi-mature, 2.5-3.0m tall x 2m wide at planting
- **2 *Acer griseum***
Paperbark Maple
Size: multi stem, semi-mature, 2.5-3.0m tall x 1.5m wide at planting
- **2 *Platanus acerifolia***
London Plane
Size: 30-35cm girth, 2m clear stem, semi-mature, typically 7-9m tall x 2-3m wide at planting
- **Proposed additional planting beds**

TOTAL ADDITIONAL TREES: 9

LANDSCAPE & PUBLIC REALM

OPTION 2: TREE PLANTING PALETTE

Proposed New Tree Species

● *Acer griseum*

Common name: Paperbark Maple

We propose to plant 3 Hornbeam because:

- Striking bark and blossom colour
- Shade and frost-tolerant

● *Betula jaquemontii (clearstem)*

Common name: Himalayan Birch

We propose to plant 4 new birch trees because:

- To match the existing palette of birch trees already on site
- The row of birch trees along the western edge of Pembury Circus have more potential to provide privacy to residents inside the adjacent building. At the same time, birch trees are slender, so will not impact light entering windows.
- Fast-growing

● *Prunus avium*

Common name: Wild Cherry

We propose to plant two cherries because:

- Native to the UK
- Small-medium sized tree appropriate to courtyard size
- White flowers in spring, red cherries in summer. Will brighten up the shady courtyard

● *Platanus acerifolia*

Common name: London Plane

We propose to plant two new Plane trees because:

- The existing three Plane trees on site are growing well and thriving
- To continue the row of plane trees along Dalston Lane, planted at a height of 7m to 'catch up' with the others
- Helps supplement the existing planting bed to frame the main entrance into Pembury Circus
